PROFESSIONAL SUMMARY

GIS Coordinator with six years of experience leading enterprise GIS, permitting, inspection, and municipal technology initiatives. As the City of Scottsbluff's sole GIS professional, I translate operational needs into practical systems from discovery and configuration through testing, training, deployment, and long-term support.

PROFESSIONAL EXPERIENCE

City of Scottsbluff

Feb 2020 - Present

GIS Coordinator

- Serve as the sole GIS professional supporting more than 30 users across Planning, Public Works, Utilities, Fire, Police, Parks, Cemetery, and Administration.
- Led the migration to Esri Small Government Enterprise, expanding enterprise GIS capabilities and modernizing the City's infrastructure.
- Designed and deployed more than 40 web applications, dashboards, and mobile workflows supporting field operations, inspections, permitting, and public access.
- Partner with department leaders to define operational problems and deliver solutions from concept through implementation and adoption.
- Configure and maintain permitting and inspection systems while integrating GIS into daily business processes.

Nebraska Department of Natural Resources

May 2018 - Feb 2020

Natural Resources Specialist II

- Operated and maintained stream-gaging and scientific field equipment and calculated stream-discharge values.
- Used ArcGIS Online, Survey123, and Collector for field data collection, while coordinating with landowners on water-rights work.
- Combined weather forecasting, surveying, equipment diagnostics, and data quality practices to support safe field operations.

Nebraska Panhandle Research and Extension Center

Jun 2016 - May 2018

Research Technician III

- Managed research datasets and analysis in Excel and MATLAB, produced Mesonet weather graphics, and created detailed study reports.
- Supported field research through weather forecasting, hardware installation, equipment repair, and diagnostic testing.

CAREER IMPACT

40+

apps, dashboards, and mobile workflows

30+

municipal users supported

12

departments served

SELECTED PROJECTS

- Enterprise GIS migration
- Online permitting system
- Building inspection workflows
- Transportation operations platform
- Public and executive dashboards
- Utility asset management
- Cemetery management application

CORE SKILLS

- ArcGIS Enterprise / Online / Pro
- Experience Builder / Dashboards
- Survey123 / Field Maps
- Python / ArcPy / SQL Server
- Enterprise GIS administration
- Project implementation
- Stakeholder engagement
- Business process improvement
- Training and user adoption
- Public-sector operations

EDUCATION

University of Nebraska-Lincoln

Bachelor of Science, Meteorology

Southeast Community College

GIS Technician Certificate
